the Documentary movie

“Japan and Nuclear Powers” Are we happy with nuclear?

Press release

My name is Hiroyuki Kawai, a lawyer known as one of leading lawyers of Ohi Nuclear Power reactor's legal battle. I have been making a pile of lawsuits against the use of nuclear power for the last twenty years.

However, I felt that spreading the word of the dangers of the nuclear power was more challenging than I had anticipated.

Finally I decided to create this documentary movie as I believed that this is the best way to help many Japanese people understand this issue.

It took two years to finish this movie.

This movie clearly shows all sorts of issues regarding the use of nuclear power. I am planning to use this documentary movie in court as evidence.

My best friend, Yuichi Kaido, also a lawyer who thoroughly supported the creation of this documentary movie. As I am the director, producer and narrator, he helps me a lot as usual lawsuits.

I hope that this preview will enhance their understanding of this issue.

Best Regards,
Hiroyuki Kawai

*This film has no English translation yet, we are more than happy with if you give us any suggestions what we need to push this file in the world.
